Fully mechanical HPA gearbox to convert an AEG SVD to a long HPA airsoft rifle

PDIK - Pneumatic Drop in Kit standard- a set of components which allows converting a AEG rifle into gas-powered.

It is cheap and very effective method of upgrade.

Conversion kit was developed with the aim of sniper rifles - where is the need for long range and precision shot.

Mechanics:

Conversion has independently movable nozzle the best stability, seal and precision of shot.

PDiK works in semi-auto mode only.

The conversion is largely adapted to the needs of the sniper. Since it is possible to get quite high fps - auto mode does not occur.

When using the appropriate regulator, it is possible to obtain a very stable, high fps. Power is adjusted by the regulator. Operational pressure is in the range 7-16bar (100-230PSI)

Construction:

Conversion KIT is sold without gearbox shell, fits with AEG Dragunov A&K / King Arms / Cyma only.

Advantages:

- No electronics (resistance to weather conditions)
- No batteries
- Precision of the FPS

- No full auto mode (some fields requirement)
- Adjustable FPS (by regulator, not included)
- Compatible with standard AEG parts (nozzle, trigger, selector plate)
- External power (many shots)
- Immediate response to the trigger

Set includes:

- PDiK V2 Gen.1 system without Gearbox shells
- About 1.2m supply hose (4mm macroline)

The kit does not include:

- Trigger
- Trigger lock
- Selector plate
- Regulator
- Gearbox shells
