Improve the performance of your arrows with Skylon Innerfit ID6.2 nocks, designed for optimum accuracy and durability.

Made from high quality composite material, these nocks offer excellent strength and ensure perfect alignment of the arrow on the string, ensuring accurate and reliable shots.

Universal Compatibility

These nocks are suitable for arrows with an inner diameter of 6.2mm, which includes popular models such as the Skylon Edge, Bentwood and Frontier. They will also fit arrows from other manufacturers that share the same specifications.

Easy Installation

The push-in design allows for quick and easy installation of the notches without the need for additional tools. This feature makes it easy to replace or upgrade your notches as needed.

Improved Visibility

The solid yellow color provides excellent visibility, helping archers easily spot their arrows whether on target or in the field. This increased visibility is especially beneficial during outdoor shooting sessions or in low light conditions.
