## The essential Ultrair gas now in high power for winter games

### Description:

For players with blowback gas-operated replicas who want to maintain recoil and peak performance without overloading their gun. Recommended for late fall and early spring games, this 164 psi\* orange gas ticks all the boxes.

This consistent, high-powered gas offers less performance dropoff at lower temperatures, ensuring you're always in the fight using your gas-operated replicas, such as metal slide pistols and GBBRs.

Like the entire new Ultrair Airsoft Power Gas range, this product has been tested to a target temperature of 25°C/77°F.

### \*Tested at 25°C/77°F

#### Features:

- 570 ml bottle
- Medium power gas 164 psi\*
- Recommended for use in late fall and early spring
- Durable metal nozzle

*Remember to use your equipment responsibly and consider the limitations of your weapons and magazines. To help you choose the right gas for your equipment, this gas has been tested over a wider temperature range, as indicated in the handy temperature and pressure range chart on the back of the product.*
